SUMMARY

Software Engineer with strong experience in building responsive and high-performance web applications using React.js, Next.js with SSR, and Tailwind CSS. Skilled in developing scalable UI components, consuming RESTful APIs, and collaborating across globally distributed teams. Passionate about delivering user-centric, accessible interfaces and continuously improving application quality and responsiveness.

AREAS OF EXPERTISE

- | | | |
|-----------------------------|------------------------------|----------------------------|
| • HTML, CSS, Tailwind, SCSS | • MongoDB, MySQL, PostgreSQL | • Agile, Scrum, Jira, SDLC |
| • JavaScript, TypeScript | • UI/UX, Figma | • Git, Github |
| • Reactjs, Nextjs | • Cypress, Jest | • Vercel, Netlify |
| • Node, Express | | |

PROFESSIONAL EXPERIENCE

HAKU Clothing | Myanmar

Full-Stack (Remote) Jan 2024 – April 2024

- Developed and enhanced digital product features using React.js and Next.js with Server-Side Rendering (SSR).
- Collaborated closely with designers, backend engineers, and QA to deliver high-value, user-focused solutions.
- Integrated RESTful APIs and implemented efficient UI state management to improve performance.
- Applied Tailwind CSS for responsive, accessible, and visually polished user interfaces.
- Contributed to agile sprints and participated in rapid prototyping and iteration based on user feedback.

Golden Cherry Hotel | Myanmar

Front-End (Remote) Oct 2023 – Dec 2023

- Built and optimized responsive web interfaces, increasing engagement by 40% using React.js and SCSS.
- Collaborated with UI/UX designers and backend engineers to implement modern, accessible UIs.
- Integrated frontend with RESTful APIs to ensure data-driven features and seamless UX.
- Enhanced app speed and performance by implementing lazy loading and reducing bundle size.

MEW Int Ltd | LA, United State

Software Engineer (Remote | Full Time) June 2022 – Sep 2023

- Created interactive web (3D Web) features using Three.js, React, and Next.js, boosting user engagement by 25%.
- Refactored frontend components to improve application quality, load speed, and responsiveness.
- Led code reviews and collaborated with globally distributed teams in Agile sprints.
- Worked with design and QA to ensure smooth deployment of cross-browser compatible features.

PROJECTS

NEAR ABAC

[Source Code](#) | [LiveDemo](#)

- Built a full-stack web app that helps new university students discover nearby places (restaurants, hotels, cafes).
- Integrated Google Maps API and social scraping for real-time data from Google, Facebook, and Instagram.
- Designed and developed a responsive UI with ShadCN + Tailwind CSS; deployed with Vercel.
- Authenticated users with Clerk Auth; enabled personalized features and location tracking.

Content Generator AI agent

[Source Code](#) | [LiveDemo](#)

- Built with Python and using the LLM model Gemini and Ollama local.
- Deployment using Streamlit for a prototype lightweight version.
- This AI agent integrates with the Notion database, making it easy for users to insert generated data into their own database.

Car ServicePro

[Source Code](#)

- Developed a full-featured auto service center management system with separate admin and user dashboards.
- Streamlined workflows for appointments, inventory tracking, and service logs.
- Designed and implemented a database schema using PostgreSQL, optimized for query performance.
- Built clean UI components using ShadCN + Tailwind with responsive design principles.
